OBJECTIVE

Motivated software engineering student seeking a Back-end Developer Internship to apply knowledge of Java, Spring Boot, MySQL, and RESTful APIs. Eager to contribute to real projects, support team development, and build scalable, maintainable web services that create value for the company.

SKILLS

PROGRAMMING LANGUAGES

- C (fundamental, basic)
- Java OOP (3 semester)
- HTML5 & CSS

FRAMEWORKS

- Spring Boot (1 semester), React (basic)

DATABASES

- MySQL, SQL Server

AUTHENTICATION

- JWT, OAuth2

PROJECTS

- **Drug Use Prevention Support System**
  12/05/2025 - 18/07/2025
  Role/Main tasks: Leader/Back-End Developer
  Team Size: 4
  Tech stack: Spring Boot, MySQL, RESTful API, JWT, OAuth2, Cloudinary, GitHub, Trello
  Description: A web-based platform for a volunteer organization to support drug prevention in the community. The system enables users to access age-specific online training courses, take risk assessment surveys (e.g., ASSIST, CRAFFT), receive personalized recommendations, book online consultations with specialists, managing outreach programs, consultants, user history, and generating reports through a dashboard.
